

M600V SCOUT LIGHT®

WHITE-LIGHT/IR LED WEAPONLIGHT w/ THUMBSCREW MOUNT

.....

Model Number: M600V-A-BK
M600V-A-TN

UPC Number: 084871321143 (BK)
084871321150 (TN)

MSRP: \$489.00

.....

The M600V Scout Light is a lightweight, compact WeaponLight featuring a high-output white-light and infrared LED in one sealed unit. In white-light mode, its recoil-proof LED generates a versatile, 150-lumen tactical beam capable of temporarily blinding and disorienting an aggressor. In infrared mode, the 120-milliwatt LED produces a beam that's invisible to the naked eye, for use on stealth operations involving night vision devices—no filter required. Switching between the two modes is achieved via a no-look, self-locking selector ring, even on the

fly. The ergonomic M600V attaches quickly and securely to any MIL-STD-1913 rail via its integral thumbscrew clamp and is activated by clicking its pushbutton tailcap switch or, for fingertip control without altering your grip on the weapon, by pressing its pressure-activated tape switch (both included). Constructed of lightweight aerospace aluminum, hard anodized with a Mil-Spec finish, and O-ring sealed to keep out the elements, the tough M600V will endure combat-like conditions without any sacrifice in weapon maneuverability.

FEATURES & BENEFITS

- Virtually indestructible white-light/IR LEDs are enclosed in one sealed unit and regulated to maximize light output and runtime
- On-the-fly switching between white-light and IR mode—no IR filter required
- TIR lens shapes versatile beam with enough reach and surround light for longer- and close-range tasks
- Hard-anodized aluminum body, tempered window & O-ring seals make light rugged and durable
- Ergonomic tailcap and pressure-pad tape switching included
- Thumbscrew mount attaches quickly & securely to in-spec MIL-STD-1913 rails
- Powered by two 123A lithium batteries with 10-year shelf life
- Backed by SureFire's No-Hassle Promise
